

COMPETENCE

Marlize Barnard

B.Cur; B.Cur (Ed et Admin)

MSc Health Systems Management

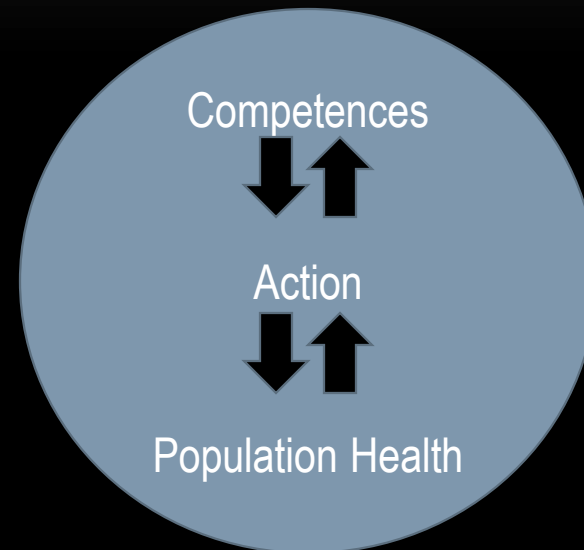

APHEA ACCREDITATION AND ASPHER CORE COMPETENCES

WHAT IS COMPETENCE?

➤ Competence represent a potential to observe, analyse, act and follow-up the results of the planned and implemented action

➤ Therefore, the relationship between potential, concrete action and population health challenge denotes a logical iterative chain

(Association of Schools of Public Health in the European Region, 2018)

CEC-CHAIN: (COMPETENCES-EPHO'S-CHALLENGES)

- Relationship between competences and EPHO's = CEC-Chain
- Competences must be interpretable in the framework of action to fulfil their function in goal-oriented systems and are linked to the WHO's Essential Public Health Operations (EPHO's)
- Ten chapters, organised in three main groups:
 - Intelligence EPHO's
 - Core Services Delivery EPHO's
 - Enabler EPHO's

(Martin-Moreno *et al.*, 2016)
