# CONCLUSIONS

## We believe:

- ❖ Initiatives to improve humanization.
- ❖ The paradigm of transformation.
- ❖ The active participation of individuals, families and communities in healthcare.

## We hope:

- ❖ A change in nursing practices.
- ❖ People making decisions about their health.
- ❖ Qualitative objectives versus Quantitative objective.

THE SKELETAL SYSTEM

FOOD  
FOR  
THOUGHT

To provide quality care, dignify and empower the individual, do we need to humanize ourselves first?
